## **DETAILED ACTION**

### ***Information Disclosure Statement***

The IDSes filed 1/3/06, 5/8/06 and 6/7/06 have all been considered and placed of record. The initialed copies are attached herewith.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese document 48-101095. The reference discloses an electric power source having an irradiating energy source that radiates particles onto a secondary radiation medium that forms secondary electrons. The relative position of the medium, the source and a collector electrode are chosen to increase the output current to a load.

### ***Response to Arguments***

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground of rejection.
